

FOR HIGH DEMAND POINT-OF-SALE SYSTEMS

> INTEGRITY NXT GROUND POWER CONDITIONER

NXT Power solutions provide the cleanest available power for your equipment. Every NXT Power “INTEGRITY” power conditioner has “NXT GROUND” intergrated within each unit and combines surge diversion with a highly effective low impedance isolation transformer and noise filtering.

ELEVATE YOUR POWER QUALITY GAME

Extremely low output impedance and the intergration of NXT GROUND makes it ideal for high performing point-of-sale systems. With NXT Ground, it reduces the necessity for both dedicated electrical circuits and isolated ground wiring.

Common-mode voltage is also one of the biggest challenges point-of-sale systems face because they can cause system lockups, data losses, and “No Trouble Found” service calls with no visible warnings.

SUITABLE FOR USE WITH:

- > Point-of-sale (POS) systems
- > Security systems
- > Interconnected microprocessor-based electronics

SUPERIOR POWER PROTECTION BENEFITS & FEATURES

- Help your customers protect their electronic systems and ensure uptime all day, every day.
- Enjoy peace of mind knowing equipment is protected from problems due to common-mode voltage, spikes and transients, and more.
- Let through voltage is less than 10 volts normal mode and less than 0.5 volts neutral-to-ground when tested to ANSI/IEEE C62.41, category A&B.
- NXT GROUND provides networked systems with benefits beyond traditional power conditioners by eliminating ground loops that cause system lock ups.
- Product line options range from 80 VA to 480 VA.
